**CENTURY**  
**Data Center**

Keeping Up With New Technology and  
Technology Trends

Keeping Productivity High

Staying within Levy Limited Budgets

## 2007 GIPAW Annual Conference 21<sup>st</sup> Century Data Center

October 3<sup>rd</sup> – October 5<sup>th</sup>  
Country Inn and Suites – Waukesha WI

### Wednesday – October 3, 2007

9:30 – 2:00 pm **Golf: See enclosed sheet to register**

2:00 – 6:45 pm **Conference Registration and Vendor Hardware/Software Show**

This year we're going to try something different! Instead of visiting the booths, gathering the pamphlets, and trying to remember what each vendor offers... We're going to let you drive. That's right. This year's vendors are going to do everything in their power to let you touch the stuff. There will be 10-minute gallery type presentations at the top and bottom of each hour, demos and hands on opportunities so you can take the products for a spin yourself. We will be creating a schedule of times for you to cruise around the vendor show trying on things that interest you.

So roll up you sleeves and ...

- Copy and paste something on a smart board from Infocor.
- Create a report using Ubuntu from Open Sense Solutions.
- Receipt taxes or do a statistical query from Online Municipal Portal using the Land Record Management System Novus from Lucus Systems Solutions.

Come Early. We are expecting 40 or more vendors.

**The interactive opportunities are endless.**

7:00 - 10:00 pm **Dinner**  
Program: A Magical Evening  
Presented by: Rick Morein

## Thursday - October 4, 2007

8:00 – **Conference Registration/Continental Breakfast/Vendor Visitation**  
9:00 am

9:00 – ***The 21<sup>st</sup> Century Data Center*** Presented by: Tim Terry from AE Business Solutions  
9:45 am Sometimes we get so caught up in implementing a specific application or jerry rigging a device that we forget to step back and take some time to plan for the IT Business Enterprise as a whole. This presentation addresses the problems with traditional data center planning strategies and explores innovative approaches and technology enablers that consider business strategies, business goals, operational efficiencies, infrastructure optimization, data security and protection and developing an infrastructure capable of responding to the changing demands of a 21<sup>st</sup> Century Data Center.

9:45 - ***Managing and Securing your Microsoft Infrastructure***  
10:15 am The strategic value of ScriptLogic's award-winning applications is becoming increasingly evident as the Windows enterprise environment continues to grow deeper and more integrated. ScriptLogic solutions virtually eliminate administration errors, shrink overhead and manage system updates faster and more efficiently - improving enterprise productivity and freeing scarce IT resources to be applied to more critical tasks.

10:15 – ***Break/Vendor Visitation***  
10:45 am

10:45 – ***Virtualization*** Presented by VMWare  
11:15 am ***Disaster Recovery  
Business Continuity  
Server Containment  
VM Ware***

Virtualization is a technology that can benefit anyone who uses a computer. Millions of people and thousands of organizations around the world use VMware virtualization solutions to reduce IT costs while increasing the efficiency, utilization and flexibility of their existing computing environment.

11:15 – ***Enabling the Adaptive Infrastructure*** Presented by: HP  
11:45 am ***Reduce Cost and Improve Service  
Responsiveness, Agility, Flexibility***

Adaptive Infrastructure offerings let you evolve to a next-generation data center, reducing the cost of IT operations, increasing the quality of service to increase efficiency.

11:45 – ***Lunch Break***  
1:30 pm ***Business Meeting  
Election of Directors  
Scholarship Presentations  
Vendor Visitation***

1:30 – ***Tour Harley Davidson***  
3:30 pm One of our members suggested we showcase successful Business Operations located near the places our meetings are held.

We are pleased to present a tour of Harley-Davidson Power Train Operations. On this tour you will see robotics, computer controlled machines and assembly lines. This tour is

being specially arranged by Harley's IT Directors, just for GIPAW, to specifically highlight their operations from an Information Technology standpoint. So it's a tour for Geeks arranged by Geeks. They will be including information about the IT infrastructure behind the entire operation. Cool!

Bus returns to the Country Inn and Suites at 4:00 pm

Note to those planning to go on the tour:

- All guests will be required to complete a registration card.
- All Guests need to be 12 years of age or older to participate in the factory portion of the tour.
- All guests must wear a pair of fully enclosed, low-heeled shoes (1 inch or lower).
- No packages like backpacks, camera bags or pocketknives of any size are allowed in the facility.
- No recording devices, cameras or camera phones are allowed on tour.

## Friday - October 5, 2007

**8:00 –**            ***Continental Breakfast***  
**9:00 am**

**9:00 –**            ***IPICS – IP Interoperability and Collaboration*** Presented by: Tom Wallace - CISCO  
**10:30 am**        Communications interoperability and true collaboration using dissimilar radio systems, PSTN voice, video, and data, between organizations are significant problems in many organizations. Often, radio networks are expensive, proprietary, and do not work together with other voice and data networks. In order to meet business or service goals, there is a compelling need to collaborate across operational, organizational, and network domains.

Based on proven Internet protocol (IP) standards, Cisco IPICS delivers a flexible, dynamic, and secure communications interoperability and application platform for real-time information sharing. Come hear how IPICS delivers the “right information to the right person in the right format at the right time.”

**10:30 –**            ***Break***  
**10:45 am**

**10:45 –**            ***Hard Drive Recovery*** Presented by Wesley Gill-Gillware Inc.  
**11:15 am**        We've all had users come to our office, holding a crashed PC or hard drive in hand like the proverbial holy grail, holding back a whimper, asking ...”This is the only place my data resides...can you help me?” After chewing them out for not saving it on the server that gets backed up everyday, what do you do next?  
Learn what to immediately do, what not to do and what to do next. Learn about data reconstruction and chances of recovery. Maybe the next time you can be the hero who knew what to do to save the database.

**11:15 –**            ***“State of WI Updates”***  
**11:45 am**

**11:45 –**            ***Roundtable Discussion / Closing Remarks / Official Conference Conclusion***  
**12:15 pm**        Moderated by Lynn Grube

# 2007 GIPAW Annual Conference

**Member Registration Form (Due 9/28/07)**

**October 3rd - 5th**

**Country Springs Hotel - Pewaukee, Wisconsin**

**Physical Address:** 2810 Golf Road, Pewaukee WI. 53072

**Mailing Address:** PO Box 2269, Waukesha WI. 53187-2269

# 2007 GIPAW Golf Outing

When: October 3rd

Where: Naga-Waukee Golf Course  
West 307 North 1897 Maple Ave  
Pewaukee, Wi 53072  
262-367-2153

Naga-Waukee Golf Course is located in the center of the Town of Delafield, 1/2 mile north of I-94 on C.T.H. E. It is located 5 miles from the Country Springs Hotel & Convention Center.

Prices:		9	18
	Walking	\$17	\$28
	Riding	\$26	\$36

Tee times will start at 9:00 AM and you are welcome to play 9 or 18 holes.

There will be prizes on the first 9 holes.

You will pay when you get to the golf course but please e-mail me with your name, company, 9 or 18 holes, walking or riding so that I make sure I have enough tee times reserved. When you get there you can just pair up with who ever is there or I will place in a group when you get there.

Vendors if you have any donations for the golf outing please let me know ahead of time what you will be donating.
